

## COMMON GUIDELINES FOR PROJECT IMPLEMENTATION FOR ESFP-2

- 1) All the projects must be implemented through OOP concepts and must contain classes and Objects.
- 2) All the projects must have class-diagram according to their project requirements. As shown below

Engineer is an employee

- 3) All the projects must implement file-handling and I/O formatting concepts.
- 4) All the functions like **get\_id()**, and **set\_id()** must be properly commented.
- 5) All the project must Objective and proper process flow as to how the project will execute.
- 6) Algorithms must be shown for functions.
- 7) Flow-Chart must be properly implemented.
